

UNLOCK THE NEXT LEVEL IN PARTNERSHIP WITH MAK

Our flexible simulation applications and infrastructure tools stand the test of time. Over the past 30+ years, MAK's success is founded on solid designs, meticulous execution, and an established culture of partnering with our customers to ensure the tools align with their priorities.

With that partnering spirit baked into its core, MAK's Simulation Solutions team stands ready to become an extension of your team to take on your toughest simulation challenges and help you deliver success.

Better together

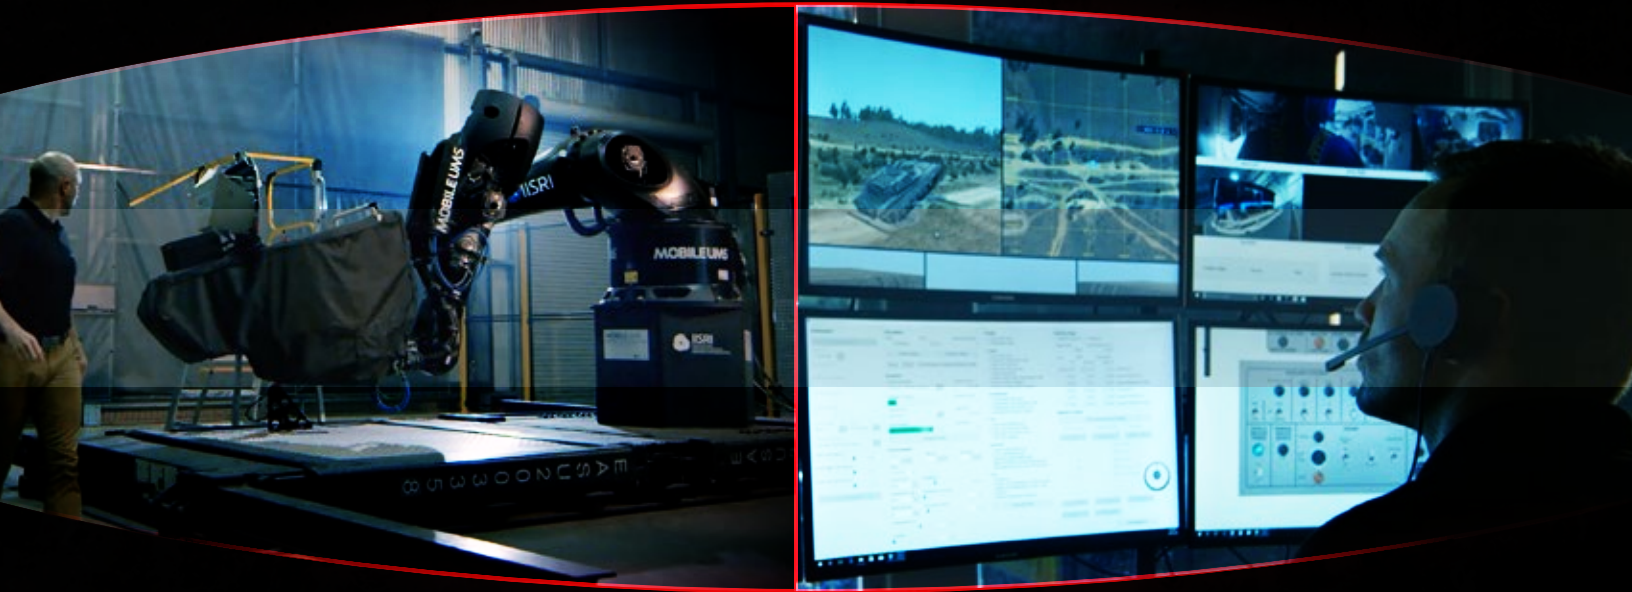

Here's what MAK can do for you.

As your partner, the MAK Simulation Solutions team brings our diverse experience to bear on your program requirements. Lean on us to:

- Consult and provide subject matter expertise to your project team.
- Deliver system designs that meet your end user requirements.
- Support your team through the entire design lifecycle.
- Enable you to meet tight deadlines by building subsystems and system components.
- Help you analyze requirements and deliver a terrain solution that meets your interoperability and fidelity needs.

LET'S BRING YOUR VISION TO LIFE.

Our Approach to the End-User's Success: Our innovative and open approach yields **effective and efficient training systems**. This goes hand in hand with the continuous demand for defense modernization to maintain warfighter readiness.

Why Choose MAK?

You want a team with experience and a diverse range of skill sets. Our critical skill experience includes:

- Program management
- Software engineering
- Quality management and engineering
- Visual Systems development and integration
- Terrain Database design and production
- 3D art & modeling
- Proposal writing and business development

Experience counts.

Our team has practical experience with projects as wide-ranging as Modeling, Simulation & Training projects ranging from Combat Aviation to Synthetic Environment stimulation of C4I systems, to Project Control and Oversight.

We've got what it takes to get your projects where they need to go. Reach out and let's discuss how to maximize your success.
