

TRAINING SOLUTIONS DESIGNED TO FIT **YOUR** TRAINING NEEDS

Because of the strength and flexibility of the MAK ONE multi-domain whole world simulation platform, we can build training solutions of all shapes and sizes to solve your unique training challenges. This document shows a few of our MAK ONE-based training solutions available for your training needs:

MAK FIRES ▶

A realistic and portable observed fire training system that delivers effective Call for Fire (CFF) training at the Point of Need. Based on CFF fundamentals, MAK FIRES is designed specifically to develop and reinforce skills for Forward Observers (FO). Students train in a classroom, one-on-one with an instructor, or practice individually using the voice activated Fire Direction Center, which uses speech recognition technology for instructorless practice.

With MAK FIRES, trainees benefit from flexible configuration options to prepare for live fire. Out of the box, MAK FIRES can train all Artillery Fire Mission Tasks in Artillery Tables 4 and 5 and supports all primary training tasks for FO.

◀ **MAK COMMANDER**

A low-overhead military decision making process solution that simulates a full spectrum of operations at all levels – from squad leader up to division level. Whether you're training for regular or irregular warfare, border and force protection, or civil emergency response, MAK COMMANDER provides realistic scenarios to challenge the trainees so they can hone their decision-making and communication skills.

PREPARE FOR LIVE TRAINING
EVENTS THROUGH TERRAIN
FAMILIARIZATION AND
MISSION REHEARSAL.

US & International Versions
of MAK Training Solutions are available.

MAK FIRES is available for purchase through:

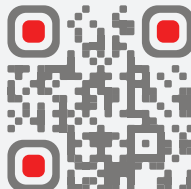

- ▶ **COMPUTER HARDWARE, ENTERPRISE SOFTWARE AND SOLUTIONS (CHESS) Contract Vehicle:**
<https://chess.army.mil/>

DLA through:

- ▶ **ADS**
<https://www.adsinc.com>
- ▶ **Darley Defense**
www.darleydefense.com

info@mak.com

MAK has launched a line of Training Systems products that provide accessible training to warfighters. By combining our Orlando-based training solution and subject matter experts with our Cambridge-based MAK ONE commercial product development team, our end user training products are maintainable, low overhead, visually appealing, and capable of individual and collective training in multi-domain operations.

◀ **MAK GROUND**

MAK GROUND provides a flexible environment for replicating commander, gunner, and driver stations. Role players can interact with Artificial Intelligence (AI) team members within the MAK ONE multi-domain environment to train their individual skills.

MAK ISR ▶

A flexible and powerful solution designed to address the range of Sensor-Operator and Pilot training requirements, from adding Intelligence, Surveillance, and Reconnaissance (ISR) sensors to existing training systems, to training in-depth system operations, to training the full airborne mission team.

MAK Is Your Partner in Training Solution Success

Building on more than three decades in the modeling and simulation industry, MAK Technologies has become a trusted supplier of Training Solutions powered by our MAK ONE Commercial-Off-the-Shelf (COTS) simulation technology for both the United States (US) Department of Defense (DoD) and customers around the world.
